

# KAISPE HR Recruitment Automation is a model driven app developed to hyper automate the end to end recruitment process

*Powered by  
Microsoft Power  
platform*

- **Configure recruitment projects, job positions, skills, interviewers, departments, interview rounds and other relevant information using a simple and intuitive model driven app**
- **Automation gets triggered by either receiving an email from candidate or job position form filled**
- **Use AI Builder to scan candidate information for shortlisting**
- **Hyper automation from sending email notifications to candidate to shortlisting, sharing interview time slots, booking calendars, scheduling next interview rounds and much more**
- **Reports and dashboards**
