

KAISPE TherapyCare

for Speech Therapy Centers

An integrated cloud based solution to connect with patients and reduce administrative overhead by tracking patient record through registration to final discharge

What is Speech Therapy Health Care Solution?

As the healthcare industry has moved towards a more patient centric approach and active patient engagement throughout the care process, the need for an integrated solution for speech therapy patients is growing. Patients and their attendants have more interest now to get the medical records including therapy sessions recordings, therapist notes, final assessment reports and other useful documents accessible anytime and anywhere on cloud.

Our Speech Therapy solution is a fully integrated solution built on top of Microsoft Dynamics 365. The solution provides both an online portal to bring healthcare professionals and patients together, and a back end patient relationship management application to maintain records like therapist information, therapy sessions, patient history, billing, payments etc. The back end application can be connected to an accounting information system, an ecommerce platform or ERP application through a secure integration mechanism. Our online portal allows patients to access personal health records from anywhere, at any time, through an Internet-connected device. Through the speech therapy portal, patients can do online registration, update their personal information and complete health forms before visiting the therapist. This not only helps to reduce waiting times for patients, but it allows staff to spend less time on administrative tasks.

Why customers use our solution?

- Reduces clerical and administrative work
- Streamlines patient-therapist communication
- Secure patient messaging system
- Built on top of highly scalable and reliable Microsoft Dynamics 365 Customer Engagement application

Our Solution

- Secure, password-protected access
- Online patient registration
- Ability to view and request appointments
- View and download session recordings
- Speech Therapy patient education resources
- Full integration with ERP/ecommerce/Accounting systems
- View payment and billing records online
- Easy service quote entry
- Patient feedback
- Social data insights
